

## The Power of Assessment Webinar Series

<b>Module 12</b>	<b>Effective Assessment Leadership Part II</b>	<i>Available after April 22nd</i>
	<p>This final module will focus on two specific leadership areas. First, participants will come to know what effective implementation planning looks like and how a leader can ensure that a new idea becomes an established practice or routine. Second, participants will explore the inevitable challenges and roadblocks and come to understand how leaders can respond to those challenges in a positive, productive, and proactive way. Rather than trying to avoid these challenges, leaders will become more strategic and purposeful when these challenges appear through the implementation process.</p>
